PROFILE

Software engineer with 5 years of experience building Python and TypeScript services for logistics and e-commerce. I enjoy making systems faster and easier to run.

EXPERIENCE

Software Engineer, Parcelwise Mar 2021 – Present

- Built Python and TypeScript services that schedule deliveries for 1,200 drivers across the UK.
- Cut API response times by 38% by redesigning PostgreSQL indexes and adding Redis caching.
- Moved 14 services from virtual machines to Docker containers on AWS, reducing hosting costs by 22%.
- Introduced automated testing with pytest and GitHub Actions, raising test coverage from 41% to 83%.
- Mentored 3 junior developers through code reviews and pairing.

Junior Developer, Brightlane Digital Sep 2019 – Feb 2021

- Developed React and Node.js features for 6 client e-commerce sites.
- Built a product search API in Django that handled 50,000 searches per day.
- Fixed accessibility issues to meet WCAG 2.1 AA on 4 client websites.

SKILLS

Python, TypeScript, JavaScript, Django, FastAPI, Node.js, React, PostgreSQL, Redis, Docker, AWS, Git, GitHub Actions, pytest, REST APIs

EDUCATION

BSc Computer Science, University of Leeds, 2016 – 2019 (2:1)

CERTIFICATIONS

AWS Certified Developer – Associate (2022)
